

As a ...	I want to ...	So that ...
Scrum Master	ensure the Scrum Team follows Scrum principles	the Team can deliver a potentially shippable product at the end of each sprint, with high business value for the customer, quickly with minimal waste, high quality and without disruptions to the Team's Sprint Backlog
Scrum Master	facilitate the Sprint Planning Process	to ensure the Product Owner and Team have a common goal for the coming Sprint and so the Team can generate a Sprint Backlog based upon their estimated velocity
Scrum Master	protect the team by making sure they do not over commit themselves to what they can achieve during a sprint	the Team can become remain engaged, motivated , become hyper productive and give the customer confidence
Scrum Master	facilitate the Daily Scrum (Daily Standup Meeting) by asking each member of the Team the following three questions: What did you do yesterday? What are you going to do today? Is there anything standing in your way?	the Product Owner and Team can see how they are progressing through the Sprint and to raised any issues that are standing in their way
Scrum Master	maintain the Sprint Burndown Chart	I can communicate the velocity of the team
Scrum Master	build an Impediment Backlog by collecting impediments raised during the Daily Scrum (Daily Standup Meeting)	I can create a prioritised list of impediments/obstacles the Team is facing
Scrum Master	removing the highest priority impediment first before addressing the others in the Impediment Backlog	I can help clear the way for the Team to perform and to ensure time is not wasted addressing issues that have become irrelevant having now removed the highest priority impediment
Scrum Master	facilitate the Sprint Review	the Team can demonstrate to the Product Owner the level of success they have had in meeting the Sprint Goal and take the experiences from the Sprint into the next to improve the Teams performance during the coming Sprints
